Subject: RE: Conference Call Schedule
Attachments: Mid-City Plating Photo Log 9-11-13.pdf

Hi Marc,

My apologies, tomorrow actually won't work for me now. However, Jacque and I will both be available this Thursday? Will that work for you? Anytime but 11:30am – noon CST.

Just to give you an update – I have attached the photograph log from my September inspection. I also have listed some issues below that arose from that inspection.

We would like to discuss a compliance schedule with you on the conference call. We would like to know how long you think it would take you to correct these issues and come back into compliance and how much you think it will cost you.

The issues that arose were as follows:

1. Hanson Line - Sludge/liquid located in trenches. Possible storage of hazardous waste in a tank. See, photographs 1 and 2.
2. Hazardous Waste Storage Area - 26 x 55-gallon containers of F008 hazardous waste were being stored on pallets. 4 containers were not labeled as hazardous waste and 4 containers were labeled with dates of accumulation greater than 90 days. See, photograph 4.
3. Hazardous Waste Storage Area - F006 hazardous waste was being stored in cubic yard boxes. 4 out of 6 boxes were not labeled as hazardous waste. 3 of the boxes were labeled with dates of accumulation greater than 90 days. See, photograph 5.
4. E-Coat Line – liquid was still located in the waste water treatment trench. Mid-City thought that the liquid could be non-hazardous based on the E-coat process. See, photographs 3 and 8.
5. Barrel Line – debris and material were still located near and underneath the line. See, photograph 13.
6. Barrel Line – debris and material were still located within the waste water treatment trench. See, photograph 14.
7. Barrel Line – liquid was located within the containment area underneath the plating line. See, photograph 15.
8. Filter Press – Box storing F006 hazardous waste was not labeled as Hazardous Waste and did not have a date of accumulation. See, photograph 18.
9. Jessup Plating Line – Hazardous waste was still being stored in containment below the plating line, which uses cyanide in the process. Mid-city stated that the hose is used to pump the waste back into the process bath; however the containment was still full of liquid and debris. See, photographs 19, 20 and 21.
10. Jessup Plating Line – Hazardous waste was still located in the waste water treatment (WWT) trench leading from Jessup line to WWT unit. See, photograph 23.
11. Utilite Machine – though the floor was much cleaner than before – material and debris were still located inside of the machine. See, photographs 31 and 32.
12. Hazardous waste storage area – one 55-gallon container of F008 hazardous waste was being stored in a different hazardous waste storage area having an accumulation start date greater than 90 days. See, photographs 26 and 27.

Thank you for your help and please feel free to call me with any questions,

Jamie

Sorry for the delay was out of the office yesterday.
I think next Tuesday will work I will confirm with Rod and email you back.

Thank you,
Marc Muzzarelli

Hi Marc,

Will you and Rod be available next Tuesday, 1/28? Jacque and I are available any time that day. Please let me know what time works best for you.

Thank you,

Jamie

Was just informed that Rod must be out of the office on Wednesday. We are also digging out from a major snow storm and as of this email, no production is going on. We should be back on track by Wednesday but again Rod will not be here. Please advise when you would like to reschedule. I'm sorry for the inconvenience.

Thank You,
Marc Muzzarelli

Hi Marc,

Sounds good. Let's tentatively schedule a conference call on 1/8 at 10:30am EST. We are happy to call you. Just let me know what number works best.

Keep me posted if anything changes.

Thank you and we'll talk soon,

Jamie

Thanks Jamie,
I'll get with Rod and see what date will work. I'll shoot for the 8th and keep you informed.

Thank you,

Hi Mr. Muzzarelli,

Tom and I weren't able to work out a time this week. I'm on travel for inspections next week and then I won't be available until after the new year.

How about January 8? Or perhaps another day that same week, if the 8th doesn't work?

Thank you for your time and please feel free to call me with any questions,

Jamie

Hello Ms. Paulin

Sorry for the delay. My mother (Rod's wife) is in the hospital and we are both in and out between visits. I will update you as soon as possible with a time frame for the conference call if that is ok.

Thank you,
Marc Muzzarelli

Subject: Conference Call Schedule

Hi Mr. and Mr. Muzzarelli,

We would like to schedule a conference call to discuss your status based on my last inspection in September. We would also like to discuss the RCRA portion of the case and where we proceed from here.

Might you have some time this week, after Tuesday, or next week? We'd be happy to call you via conference to discuss.

Jacquie Clark has taken a detail position elsewhere so the attorney for this case will now be Tom Williams. He and I will be the contacts giving you a call.

Thank you so much for your time and please feel free to email me, or call me, with available dates.

Jamie
